Recap Day

Here is a list of labs to work on during the recap to reinforce all the knowledge we have gone through so far.

Feel free to do all the labs listed below or simply work and spend more time on those that are closer to your needs and interests.

Feel free also to take this time to review the slides, ask questions, and redo previous labs if this is more beneficial to you than going over additional labs.

Additional Kubeflow Labs

[KubeFlow pipeline with Python lightweight components](#)

[AutoML Kubeflow pipeline with online predictions](#)

[AutoML Kubeflow pipeline with batch predictions (solution only)](#)

Additional TensorFlow Extended Labs

[CI/CD with TFX pipelines](#)

[Using tfx templating to generate a tfx pipeline scaffold](#)
